**Easy with Florabella:  
Even as a beginner,  
rise beyond yourself like a pro.**

Florabella helps hobby gardeners with the care of their plants for over 60 years. Whether flowers, green plants, fruits, vegetables or herbs - Florabella quality potting soils offer you professional quality.

- They provide an ideal water storage to prevent plants from drying out
- Drain excess water and thus prevent waterlogging
- Provide roots with a good supply of air and a stable anchorage for healthy growth
- Retain their first-class structure in the long term
- Store nutrients and trace elements and release them slowly to the plant
- Buffer irregularities in care, e.g. when too much or too little fertiliser or water is applied

# Always the right soil: from azalea to zucchini.

## Potting Soil

- All-purpose potting soil for optimal plant growth (with all nutrients)
- High water storage capacity (due to the addition of clay granules)
- Good drainage
- Contents: 5l, 10l, 20l, 40l, 70l

## Potting Soil + slow-release fertiliser

- Special growing medium with all nutrients necessary for healthy plant growth
- Additionally with fertiliser for the first 6 months
- Bedding, balcony and foliage plants
- Contents: 40l

## Potting Soil for Organic Growing

- High proportion of high-quality peat substitutes
- With local raw materials (green compost + wood fibre)
- For ornamental and balcony plants as well as for growing vegetables in pots
- Contents: 40l

## Potting Soil made from renewable resources

- Universal substrate without peat
- With organic fertilisation
- Nutrients are continuously released
- Contents: 40l

## Vegetable Soil

- Cultivation of vegetables in pots and containers
- For soil improvement in vegetable beds
- With all nutrients for a rich yield
- Contents: 20l

## Herb and Seedling Substrate

- For sowing herbs, vegetables and ornamental plants
- Fine structure with all nutrients
- Also suitable for pricking out seedlings
- Contents: 20l

## Geranium Potting Soil

- Special growing medium for geraniums and fuchsias
- For flowering plants in tubs/ window boxes
- Maximum water storage due to high clay content
- Contents: 20l, 40l

## Green Plant Soil

- For potting foliage plants, palms and ferns
- With valuable clay minerals
- Good drainage properties
- Contents: 20l

## Growing Media for Orchids

- For potting orchids and other epiphytes
- With pine bark for a loose, airy structure
- Prevents waterlogging and root rot
- Contents: 5l

## Acidic Plant Soil

- For planting azaleas and rhododendrons
- Also for other ericaceous plants that prefer acid soils
- With all important nutrients
- Contents: 20l, 40l, 70l

## Soil Conditioner

- For all planting work in the garden
- With the full range of required nutrients
- Also for outdoor use in tubs/ window boxes
- Contents: 70l

## Cemetery Soil

- Covering soil for graves
- Fine, ready-to-spread and deep black
- Contents: 20l

## Ornamental bark

- High-quality and decorative pine bark
- For covering beds and plant tubs
- For the design of garden paths
- Contents: 60l
